Keyboard Shortcuts for Carrara

This reference is basing on Carrara version 8.5.0.172 from July, 27, 2012 (updated to version 8.5.0.243 from August, 26, 2013).

In Carrara, you can change the keyboard shortcuts of most commands and tools.

PLEASE NOTE:

Viewpoint Experience Technology (VET): Windows 32-bit only.

PLEASE NOTE:

NEW in Carrara 8.5: the following commands in the menu **Animation**:

- Next Frame
- Previous Frame
- Play/Stop
- Fit to
- Zero
- Memorize
- Restore

Conventions

This Reference is for both Macintosh and Windows. By convention, Macintosh commands precede Windows commands in the text.

For example:

- **Command/Ctrl+I** is equivalent to the Macintosh **Command-I** and the Windows **Ctrl+I**.

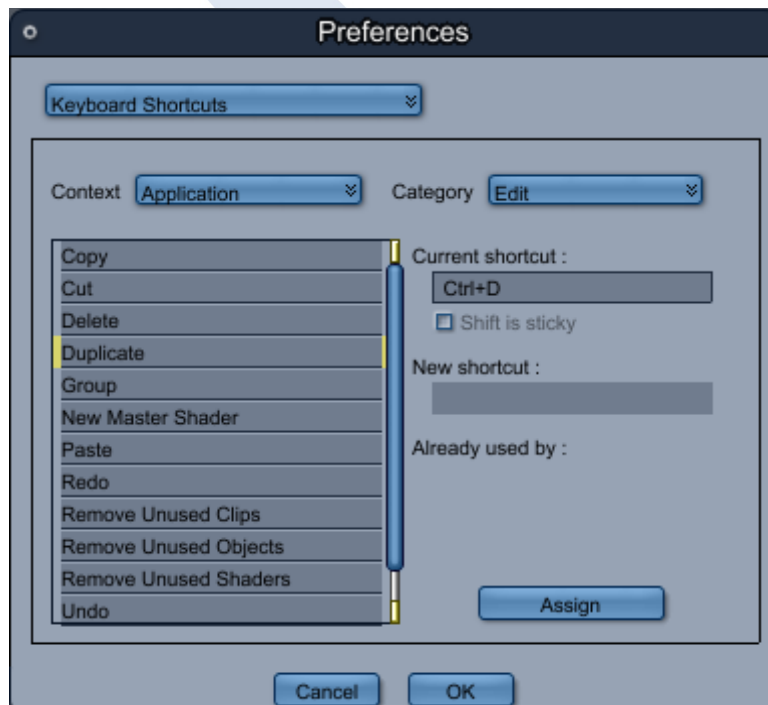

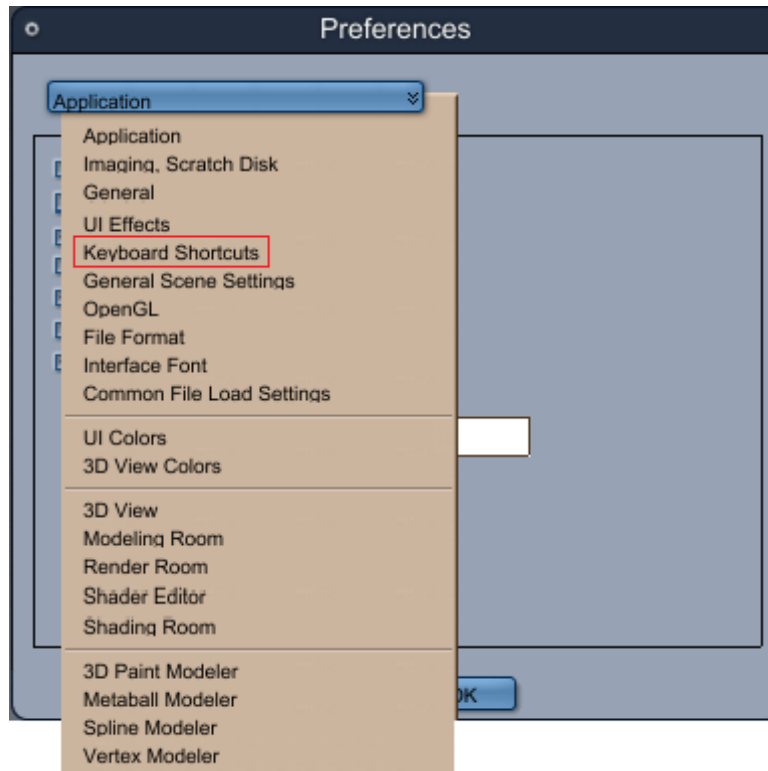

Changing Keyboard Shortcuts

To edit a shortcut:

1. Choose **File > Preferences**.

2. Choose **Keyboard Shortcuts** from the pop-up menu.

3. From the **Context pop-up menu** select the context of the command. Choices are:

- 3D Paint
- Application
- Spline Modellierer
- 3D View
- Shading Room
- Vertex Modellierer

4. From the **Category pop-up menu** select the menu or tool bar where the command appears.

5. In the shortcut list, click on the name of the command or tool that you want to modify. The current shortcut, if any, appears in the Current Shortcut field.

6. To add or change a shortcut, click in the **"New Shortcut"** input box to activate it.

7. Press the combination of keys you'd like to use. For example press Command/Control and the S' key. If the

shortcut is already used, the application tells you by which command. Generally, tools use a simple letter, while menu commands use a letter with Command/Control.

8. Click on the **Assign** button and then on the **OK** button to record the shortcut.

Application

File

Command	Shortcut
Close	Ctrl+W
Export	
Import	
New	Ctrl+N
Open	Ctrl+O
Open Preset	
Page Setup	
Preferences	
Print	
Reset Preferences	
Save	Ctrl+S
Save As	

Edit
